## Natural avalanches on Woody Ridge

Woody Ridge Cooke City 2/9/2021 Code SS-N-R2-D2 Latitude 44.97390 Longitude -109.92400

Notes

From email on 2/11: "interesting Av. activity in a Central Park - mid-lower Woody. This is an area that cross-loads like crazy, so it's not surprising to see slides, but the extent was impressive; essentially, slides propagated across the entire zone. These are all mid-slope ~9,000-9,200"

Likely broke following the wind event on 2/9/2021.

Number of slides
